

Galli Pooper

What is a portable dry toilet?

A portable dry toilet, is a place for you to go to the toilet without the need to carry water to 'flush' the toilet.

Being portable, and weighing less than 2kg it is very easy to move in and out of your campervan or 4WD camper. The toilet is the height of a regular toilet, at approx 400mm.

How does this portable dry toilet work?

A tough outer bin liner is placed inside the toilet and tucked over the top edge. Seven other thinner bags are then placed the same way inside each other, and tucked over the top edge.

A purpose built toilet seat is then placed on top of the toilet and it is ready for use.

Following each use, toilet crystals are sprinkled into the toilet which gels the liquid waste. After each use, the top bag is knotted and sealed, then placed in the bottom of the toilet. The same process is repeated until the thick outer black bag is reached. Tie off bag as before, but as this bag is larger, loop bag back over contents and tie off again. This will ensure a secure, contained package ready for disposal in the normal trash system through to land fill.

The toilet can be used for any human waste. The crystals gel the liquid contents, with the bag liners sealing the waste for easy disposal.

When can it be used?

The great thing about the portable dry toilet is it is lightweight and stable, so can be used in or out of the vehicle.

You may be in a town with no handy toilet facilities, or in a remote lunch location. The toilet can be used inside the vehicle.

If you choose to hire the Galli Ensuite from us, you will have a privacy tent that can be erected in seconds if you prefer to use the toilet outside of your vehicle.

If you are someone that needs to get up during the night to use the toilet – having one inside or just outside your vehicle will provide more convenience.

Why use a portable dry toilet?

When choosing to freedom camp in Australia, some do not have toilet facilities. To ensure these remain beautiful for years to come, it is important you are self contained.

Having your own portable dry toilet provides more convenience and comfort when camping.

If hiring a motorhome with an onboard toilet, you will need to find regular 'dump stations' to empty your black water holding tank. The portable dry toilet eliminates the need to find these stations, or have enough water on board to operate the toilet.

What does the Galli Pooper portable dry toilet cost?

The Galli Pooper portable dry toilet can be rented from Gallivanting Oz, or purchased from us.

If renting, it is included as part of the Galli Ensuite (portable dry toilet, power shower and privacy tent) and includes the toilet crystals for the hire period for two people.

The cost for the Galli Ensuite package is AUD\$10* per day, with a minimum of AUD\$200 per hire.

** enough Galli Pooper Toilet Crystals and bags for up to two people for the duration of hire is included in the price. Please note the Galli Ensuite is available from Brisbane - there may be an additional freight charge when collecting or returning to a different location. If interested, please enquire for more details.*
